

Copeland™ ZX Refrigeration Condensing Units. The intelligent choice for small retail and food service applications, combining energy savings with user-friendly electronic features.

The Copeland ZX platform has been designed based on the three factors demanded by industry users;

- ➔ **Energy Efficiency** Copeland scroll compressor technology, variable speed fan motor, large capacity condenser coil and advanced control algorithms work together to significantly reduce energy consumption.
- ➔ **Reliability** With advanced electronics controller and diagnostics, including fault code alerts, equipment reliability is greatly enhanced.
- ➔ **Intelligent Store™** Integrates hardware and services to provide retailers a single view into their entire network of facilities for better decision making.

COPELAND™

Suitable for;
Med Temp (ZX-MT), Low Temp (ZXL-LT)
and Digital modulated variable capacity
Med Temp (ZXD-MT) refrigeration.
